Controlling Invasive Plant Species

Fayette and Union County SWCDs have funding available for landowners!

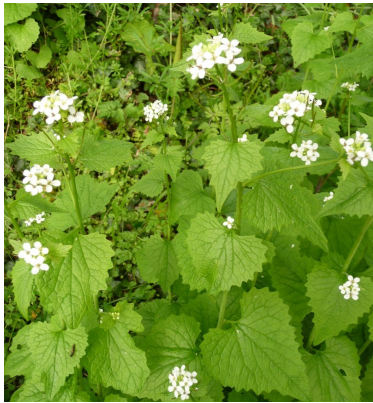

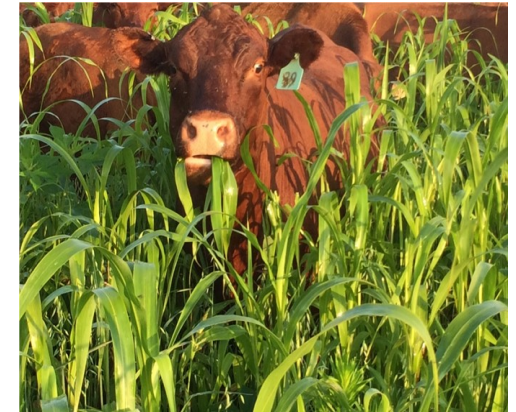

Summer 2021

Fayette County SWCD and Union County SWCD jointly applied for a Clean Water Indiana Grant to help landowners in both counties.

One goal of the grant is to introduce the benefits of cover crops on fields through a cost share program for landowners. Cover crops help to keep the soil and nutrients in the field as well as keeping the soil organisms needed to help in the field alive and well after harvest and through the winter.

APPLICATION DEADLINE AUGUST 3, 2021

Another goal of the grant is to help landowners remove invasive plant species from their land to help our native plant species gain back that ground. Invasive plants are aggressive and have methods to take over native woodlands by out competing native plants for space. Plants such as Asian Bush Honeysuckle and Garlic Mustard actually put out chemicals in the soil that keep other plants from establishing in the area.

APPLICATION DEADLINE SEPTEMBER 3, 2021

Applications can be found at:

<https://fcinswcd.org/>

<https://ucinswcd.org/>

<https://www.facebook.com/fcinswcd>
